## Southwestern Medical Foundation Host Unlocking the Mysteries of Brain

**D**r. Marc Diamond, one of the world's leading researchers in Alzheimer's and neurodegenerative diseases, spoke about unlocking the mysteries of brain disorders during a recent Southwestern Medical Foundation event at Old Parkland.

"What's Next? The Newest in Neuroscience: Moving Beyond the Unknown Unknowns" was part of the Leading the Conversation on Health series created by the Foundation. Dr. Diamond is Professor of Neurology and Neurotherapeutics and Founding Director of the Center for Alzheimer's and Neurodegenerative Diseases at UT Southwestern Medical School. He spoke September 24 in the Pecan Room at Old Parkland in a conversation with **Dr. Daniel K. Podolsky**, President of UT Southwestern Medical Center.
